Green ports fostering
zero-emissions in

BLUE SUPPLY CHAINS

The Blue Supply Chains project will provide a three-pillar approach on how port authorities can support greening process in port operation (electrification of handling equipment), by providing alternative fuels (bunkering & charging strategy) and by pushing to set-up green transport chains (combined transport).

This #MadeWithInterreg project helps drive the transition to a green and resilient Baltic Sea region.

Organisations from the following countries cooperate together to make that happen:

Denmark, Estonia, Germany, Latvia, Lithuania, Norway, Poland, Sweden
